General Information

Shaw's® Turf Food 11-3-11 is homogeneous controlled release fertilizer that contains both an organic and a synthetic form of slow release. 77% of the Nitrogen in this product is from Methylene Urea. This product will deliver the best of both worlds. An organic source that will provide your soils with the necessary nutrients to maintain the microbial population along with a dependable and predictable source of Methylene Urea. This product also contains Gro-Gard, a proprietary blend of two bio-active amino acids and co-factors; it activates key amino acids that help regulate nutrient movement between plant cells. And with greater nutrient availability, plants can achieve their full

Application Instructions

Vary your rates according to your agronomic program and soil test results. (Suggested rates and settings are listed above.) This product can be applied at a variety of different rates that release from 8 to 16 weeks. **IMPORTANT:** Read the entire directions for Use and Conditions of Sale before using this product. **FOLLOW DIRECTIONS CAREFULLY.**
