General Information

Shaw's® 12-0-24 is a homogeneous controlled release fertilizer designed for turf where superior quality is desired. 72% of the Nitrogen in this product is from Methylene Urea for long lasting feeding, up to 16 weeks. Actual release longevity will depend on environmental conditions such as temperature, rainfall and on growing practices used such as irrigation. This product also contains Gro-Gard, a proprietary blend of two bio-active amino acids and co-factors; it activates key amino acids that help regulate nutrient movement between plant cells. And with greater nutrient availability, plants can achieve their full genetic potential for growth and vigor. Gro-Gard protects your turf, optimizes nutrient uptake and movement within

Application Instructions

Vary your rates according to your agronomic program and soil test results. (See above for the spreader setting and suggested rates).

IMPORTANT: Read the entire directions for Use and Conditions of Sale before using this product. FOLLOW DIRECTIONS CAREFULLY.
