### General Information

Shaw's™ 19-0-5 with Echelon<sup>®</sup> 30, is a pre-emergence and post-emergence herbicide for control of annual grasses and broadleaf weeds in established turf grasses and established landscape ornamentals. Echelon<sup>®</sup> is a granular formulation containing 0.3lbs. of active ingredient per pound of formulated product. The mode of action of Echelon<sup>®</sup> herbicide involves uptake by both weed roots and shoots of existing weeds and prevention of growth by newly emerged weed seedlings. This product contains 40% of the nitrogen from Polymer-Encapsulated urea (XRT). XRT is a new controlled release technology that delivers a more uniform and predictable release of nutrient for a period of up to 90 days. For Extended Release Technology, trust in XRT to deliver the lasting performance you demand.
