General Information

Shaw's™ 25-3-5 is a superior quality fertilizer designed for high quality turf maintenance where slow release feeding is needed. This product contains 50% of the nitrogen from Polymer-Encapsulated urea (XRT). XRT is a new controlled release technology that delivers a more uniform and predictable release of nutrient for a period of up to 90 days. For Extended Release Technology, trust in XRT to deliver the lasting performance you demand.

Regular use will help supply the needed nutrients for thick turf with excellent color while also improving resistance to disease, wear and environmental stress.

Application Instructions

Adjust your rates based on soil test results and your agronomic program needs.
